Discover the ultimate platform for managing your school and improving engagement.

Integrator
2020/21

Simplifies daily school life for staff, students and parents.

Edulink One keeps everything in one place. It's designed to streamline SIMS data into a platform that's functional on any device. It combines everything you need to support a well-managed and connected school environment, from administration and planning to communicating with your students and their parents.

We reduce workload, cost, and complexity of systems to help you focus on what's important: engaging with and supporting your students.

“Edulink One is so much more than a parent portal. It has vastly improved our communications with students and parents, and revolutionised our staff's normal way of working – increasing efficiency and impact. We cannot imagine life without it now!”

Daryl Bond, Assistant Headteacher, Guildford County School

Our Features

Whether you are open as usual or partially shut down due to Covid-19, Edulink One's features are there to support both in-class and remote learning.

With a user-friendly app or web interface to suit different users, Edulink One ensures data is accurate and up to date by pulling data and writing back to your SIMS management information system (MIS).

What's more, Edulink One's features are fully customisable to meet your school's requirements.

Take a look at page 4 for Covid-19 case studies.

- ✓ Homework setting and tracking
- ✓ Update marksheets and view assessments
- ✓ Manage extra-curricular clubs
- ✓ Attendance and absence management
- ✓ View school reports
- ✓ Book rooms and resources
- ✓ Exam timetables and results
- ✓ View cashless catering balances

Supporting learning during Covid-19

Edulink One's homework, messaging and achievements functions help support schools to deliver remote learning

Here's how some schools have been using the features.

Queen's Park High School

"Edulink One has been the hub that links everything together during lock down. Students can talk to teachers over it very easily. For every timetabled lesson, teachers have uploaded work for students to complete and then mark as complete once done.

We are doing a lot of live lessons in Teams, but all staff and students are being directed to Edulink One as the main 'command centre' for instructions for lessons.

The Headteacher messages at the start of the day to open school and at the end of the day to close school, she gets so many nice messages off the children through it, it's really quite nice.

We have put links to mental health websites in the links section and just used it as the one stop shop as we do in normal times."

Dave Helsby, Support Operations Manager

Guildford County School

"During Covid-19 lockdown, Edulink One has been invaluable in taking the school online. Guildford County is using MS Teams to timetable lessons for the students and then Edulink One for parents so that they can see what's being set and completed for their children. The school rolled out the Achievements functionality so that staff can reward students during lockdown.

Parents have raved about achievement points (and Edulink in general) during lockdown, and so many commented that they have kept students (and parents) motivated.

The school has also successfully launched the Messaging functionality during lockdown to support remote learning, enabling staff to contact groups of students and parents instantly. One member of staff commented: "Being able to send a message instantly to all the students and parents in my class (reminder of an upcoming remote assessment or homework submission deadline) is so powerful. Best thing ever...!"

Daryl Bond, Assistant Headteacher

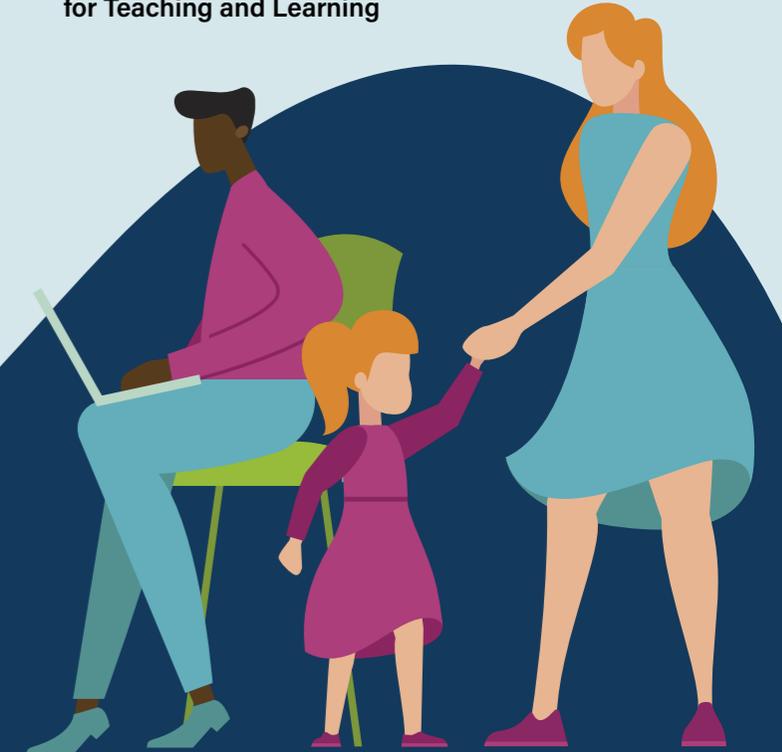

The Commonweal School

"During Covid-19 lockdown, Edulink One has made communicating and taking school life online relatively simple.

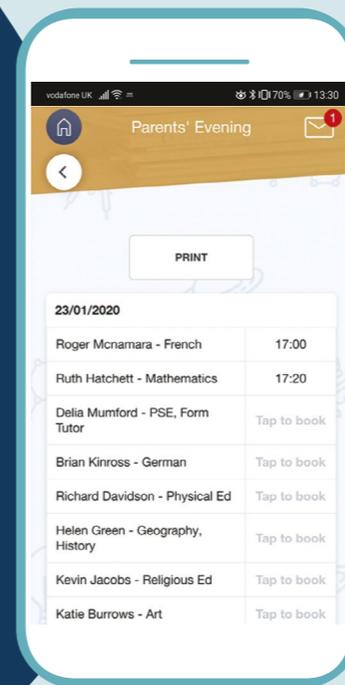

Commonweal has 1380 students, 86 teachers and 78 other staff using Edulink One on a daily basis. Teachers set fortnightly work with the exception of years 11 and 13. Parents and students can both see what's required, what's been done and any feedback given; staff monitor, feedback and communicate; and it's working well."

Nick Bartlett, Assistant Headteacher for Teaching and Learning

“What we really liked was that within one unified platform we had a single solution that would allow us to communicate, engage and share data with teachers, parents and students.”

Network Manager,
UCTC

Manage parents' evenings remotely

Make organising a parents' evening hassle-free with Edulink One. You can set up events, allocate timings and staff and give parents access to book via the app. Both staff and parents can print the event timetable and you can measure engagement levels by tracking parental attendance too.

Coming soon, our **NEW video** call integration, helping your school to engage in a safe and effective way.

Key Benefits

- ✓ One single login for all functions
- ✓ A user-friendly SIMS interface with write-back, allowing staff and students to work anytime, anywhere including on iPads and Chromebooks
- ✓ Convenient access to all student data including assessments, attendance, reports, achievements and behaviour
- ✓ Improved student and parental engagement through 2-way messaging (email, SMS and push notifications) and shared student information
- ✓ One place for setting and managing homework, allowing it to be monitored effectively
- ✓ Centralised management of resource room and parents' evening booking
- ✓ Reduced staff administrative workload for teachers, senior leadership team (SLT) and support staff
- ✓ Retire multiple existing systems, potentially saving thousands of pounds
- ✓ Tailor the installation to your school's individual requirements, allowing you to use alternative systems alongside Edulink One
- ✓ Reduce printing, postage and SMS costs

Unlimited users

We charge for the platform, not by the number of students

Unlimited devices

App and desktop versions allow access to Edulink One on any device

Unlimited support

Our UK-based email and phone support is included at no additional cost

What makes us different?

Edulink One brings together multiple software functions into one easy to use app, with one login.

You can use as little or as much of Edulink One's functionality as you like. Run it alongside existing software, or retire multiple existing systems and save £000's.

What's more, upgrades and UK based support are all included as standard. Long tie-ins or notice periods are not our style either. We don't like to trap customers into using us.
