Overnetdata

## Unlock savings by consolidating engagement & administration into one platform!

### Key Benefits

- ✓ Reduce administrative workload
- ✓ A user-friendly interface with MIS write-back, allowing staff to work from anywhere, on any device
- ✓ Single sign-on, with one set of log-in credentials
- ✓ Convenient access to detailed student data, including attainment, attendance, reports, achievements and behaviour
- ✓ Reduce the number of software solutions you support, saving significant time as well as potentially thousands of pounds
- ✓ The ability to improve engagement through 2-way messaging with parents and students
- ✓ Reduced printing, postage and SMS costs

## Going beyond your MIS

Edulink One provides a user-friendly way of making the most out of your MIS data, creating an improved solution for communicating with parents, staff and students - as well as being proven to significantly reduce day-to-day admin tasks.

Our teacher app ensures staff have all the information they need at their fingertips; they can easily take/view live registers, add achievement and behaviour points and view student information.

Our student and parent app encourages users to take responsibility for their school experience by having clear visibility of timetables, the ability to book extra-curricular clubs and see live attendance reports.

We found our MIS was too bulky and implemented Edulink One to seamlessly take registers and engage with parents.

## Our customers are at the **heart** of what we do

EduLink One's suite of functionality supports schools, MATs and colleges worldwide by saving valuable time as well as improving engagement.

Here's what a few of our customers have to say about EduLink One...

### **Guildford County School**

“Staff loved EduLink One from day one. It has revolutionised our parent portal and how we use data, as well as making taking registers simple. Homework setting has been standardised and managing clubs now has a proper solution. The analytics function is great for our leaders and head of years too.

Being able to access student data anywhere at anytime along with their reports is so powerful and has increased the efficiency of the conversations staff have. The greatest but unexpected benefit has been the huge time saving for staff. We can't imagine life without EduLink One now.”

**Daryl Bond, Assistant Headteacher**

### **The Commonweal School**

“The benefits! Firstly, our school has made cost savings of just under £5,000 to date as it has retired two existing systems to do remote registers and parents' evenings.

Secondly, having one login for almost all our school systems has simplified life for staff, parents and students. Setup was nice and easy from a technical point of view and the support team are brilliant.

EduLink One is such a great product, it sells itself. Parental engagement has been impressive, which has probably been the most successful element. The low price is a bonus!”

**Nick Bartlett, Assistant Headteacher**

### **Queen's Park High School**

“Staff used to complain at how clunky and slow our MIS was, but EduLink One gives you access to this data but in a much more modern, user-friendly way.

EduLink One is a really fantastic asset. It's simple to use and ties so many activities/tasks from school life together in one place. The app has helped improve communication with parents and we've seen nothing but benefits from implementing it.”

**Dave Helsby, Support Operations Manager**

# Enhancing parent and student engagement

## Messaging system

EduLink One's two-way messaging and notification system allows you to communicate via app notifications, email or SMS messages. It's highly customisable to meet your needs, and in a couple of clicks you can send a message to an individual, class or whole school.

Notification options make school admin run smoothly, whilst providing a balance between automation and control for absences, detentions, form notifications and achievement.

## Parents' evening

Make organising and coordinating parents' evenings hassle-free with EduLink One. Our flexible settings allow you to quickly set up events for either face-to-face meetings, online video calls or a hybrid approach. Parents are able to book and attend via the app, ensuring events run to time and in a flexible way to benefit all parties.

We integrate with GOV.UK Notify to provide you with 5,000 free texts

## School reports & documents

Improve efficiency and reduce costs by sharing school reports and key documents from your MIS using EduLink One. Parents and students can access these from any device, anywhere!

## Forms

Ensure letters home don't get 'lost' by replacing paper forms with EduLink One's online system. Distribute and collect information securely, saving admin time and cutting costs.

## Catering

EduLink One integrates with your school's cashless catering system. This allows parents, students and staff to view catering transactions and balances, without having to log into a separate system.

## Payments

Parents can easily manage school payments directly in EduLink One. Our dashboard directly links to your payments provider and users can access this via their app or via the web.

# Reducing teacher workloads

## Registers & absence management

Complete registers remotely on any device, giving teachers the ability to take registers wherever they are, even on the sports field or school trip. Parents can quickly report student absences via the Edulink One app at any time, reducing the amount of incoming phone calls and wait times first thing in the morning.

## Seating plans

Edulink One's seating plan module provides an easy way of planning a class layout using a simple drag and drop tool. In the event of a teacher absence, whoever covers the class will then have all the information they need at their fingertips.

## Timetables, calendar and noticeboard

Students can view their upcoming lessons easily and print their timetables off from any device. Edulink One offers the option to add a school calendar and post communications to a noticeboard. You can also access a merged view of staff timetables, making organising meetings much easier.

30-day FREE trial available

## Homework

Set and record homework so that students, parents and staff have the ability to track what work is due and see if it has been completed. Edulink One gives parents the information they need to actively participate in home-school engagement.

## Achievement and behaviour

Reward achievement, allocate behaviour points and manage detentions on the move, with a system you can tailor to suit your requirements. Available for both parents and students to view, with as much, or as little detail as you would like them to see.

## Marksheets and assessments

Give teachers the opportunity to complete marksheets remotely at their convenience. Our customisable attainment display offers the capability to keep parents up-to-date, in real-time.

## Exams

Edulink One allows students and parents to view exam entries, timetables and results virtually. Learners and parents are able to check exam information is correct and flag any errors to you.

## Easing administration

### Data collection and admissions

Collect and update pupil and parent data online, including new admissions. Edulink One can then write back to your MIS in a single click, saving hours of admin time. Parents can take control of their own details with the ability to update their information via our app. This can be completed at their convenience throughout the year.

### Club bookings

Reduce the amount of time spent organising extra-curricular clubs. With Edulink One you can quickly set up clubs, select cohorts and allow parents and students to book virtually. Advertising clubs via Edulink One has been proven to increase participation and attendance as all parties have visibility of the options available.

You can also take registers of club attendance, locate students easily and message parents and students with important information. Our platform can also gather participation analytics, allowing you to demonstrate involvement of key student groups which our customers have found useful for Ofsted inspections.

Book a demo

### Room & resource booking

Reduce the amount of time wasted trying to find available rooms and equipment. Edulink One's portal easily allows staff to reserve rooms and resources with ease, giving you insight into usage which can be particularly helpful when planning next year's budget. Our system is linked to your school timetable which will update bookings automatically and delivers notifications of changes.

### Analytics

Instantly access a virtual summary of club participation, attendance, homework setting and completion, call-outs and which documents have been viewed by users. Whether you're looking for behaviour hotspots or looking to see which parents have read the latest student reports, we've got you covered.

### Student information and SEND

Edulink One provides quick, comprehensive access to student data, including SEND strategies. You are able to view key information from assessment data to behaviour records, medical information to historic reports. With the convenience of access from any device, and our simple layout, teachers will have access to the information they need in seconds.

# Our pricing

With Edulink One, the price you pay includes everything including support, upgrades and new functionality we add. You choose which elements you want to roll out for your school, as well as how and when they are available.

Prices starting at £1.87 per student, per year\*  
Use our price estimator for an indicative quote:

- ✓ Includes UK-based support
- ✓ All functionality included
- ✓ New features added for free
- ✓ No setup fees
- ✓ 12 or 36 month contracts
- ✓ No notice periods
